

HACKATHON PITCH 2025

LifeOS

AI Chief of Staff for Students

A phone-first, AI-native multi-agent system that transforms your chaos — screenshots, emails, PDFs, voice notes — into structured action: tasks, schedules, study plans, and placement prep workflows.

THE PROBLEM

Students Are Drowning in Noise

Information Overload

Notices, emails, PDFs, group chats — critical info is scattered across 6+ channels with no unified view.

Zero Prioritization

Deadlines sneak up. Assignments get missed. No intelligent system helps students rank what matters most.

Placement Blindspots

Students miss resume deadlines, prep windows, and company notices — costing them career opportunities.

MARKET OPPORTUNITY

A \$12B+ Market Ready to Disrupt

Why Now?

- Gen Z expects AI-native, mobile-first experiences
- University digital infrastructure is rapidly modernizing
- Placement season is a high-stakes, recurring pain point
- No dominant player owns the "student OS" category

TAM: 220M+ students globally · **SAM:** 40M+ in India
· **SOM:** 500K Year 1 target

THE SOLUTION

One App. Every Responsibility. Zero Friction.

LifeOS ingests anything — a screenshot of a notice, a forwarded email, a PDF syllabus, a voice note — and instantly converts it into structured, prioritized, time-blocked action items.

1

Capture

Screenshot, voice, email, PDF

2

Understand

AI parses intent & context

3

Organize

Tasks, schedules, reminders

4

Execute

Study plans & placement prep

From Chaos to Clarity in 60 Seconds

No manual data entry. No app-switching. LifeOS does the thinking so students can focus on doing.

Five Specialized Agents, One Unified Brain

Task Agent

Extracts deadlines, assigns priority scores, and creates time-blocked to-do lists from any input source.

Schedule Agent

Auto-builds weekly timetables synced to classes, assignments, and personal commitments.

Study Agent

Generates personalized study plans from syllabus PDFs, tracking progress and adapting dynamically.

Placement Agent

Monitors company notices, tracks eligibility, preps resumes, and schedules mock interviews.

Reminder Agent

Context-aware nudges — not just "what" but "why it matters" and "what happens if you miss it."

AI-Native, Modular, and Scalable

Technical Highlights

- On-device OCR + cloud LLM hybrid for speed & accuracy
- Agent orchestration via LangGraph / AutoGen framework
- Privacy-first: sensitive data stays on-device by default
- REST API ready for university LMS integrations
- Offline-capable core features for low-connectivity regions

Watch LifeOS in Action

Input

Student screenshots a placement drive notice from WhatsApp: "TCS NQT — Register by Friday, Eligibility: 60%+, Resume Required."

Processing

Task Agent extracts deadline. Placement Agent checks eligibility. Reminder Agent sets a Thursday nudge. Resume Agent flags missing documents.

Output

Student sees: a calendar event, a resume checklist, a study plan for aptitude prep, and a countdown reminder — all auto-generated.

No One Owns the Student OS Category

Feature	LifeOS	Notion	Google Keep
AI Multi-Agent	✓ Native	✗	✗
Screenshot → Tasks	✓ Instant	✗	✗
Placement Prep	✓ Built-in	✗	✗
Study Plan Gen	✓ Auto	Manual	✗
Voice Input	✓ Full	Limited	✗
Phone-First UX	✓ Core	Desktop	Partial

Our Moat

- **Vertical depth:** Built specifically for student workflows — not a generic productivity tool
- **Agent orchestration:** Multiple AI agents working in concert, not a single chatbot
- **Input agnostic:** Works with any format students already use
- **Network effects:** University partnerships create institutional lock-in

From Hackathon to Campus Infrastructure

1 Phase 1 — MVP (0–3 mo)

Core agents live. 500 beta users. University pilot partnerships.

2 Phase 2 — Scale (3–9 mo)

50K users. Placement Agent v2. LMS integrations. Seed round.

3 Phase 3 — Platform (9–18 mo)

University API ecosystem. International expansion. 500K+ users.

4 Phase 4 — OS (18+ mo)

Default student operating system. AI career concierge. Series A.

✔ **Mission:** Every student deserves an AI chief of staff — not just those at elite institutions.
